REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The primary reason for allowance of claim 1 is the inclusion of the limitations of

"Wherein the governor lever, when operated, applies a synthesized tensile force (STF) of the tensile forces (GS) of the main spring 4 and the tensile force (IS) of the idling spring to tie fuel adjuster of the fuel pump so as to increase the supply of fuel, and cause the governor weight to decrease the fuel amount by pushing down the fuel adjuster, so that a disequilibrium between the synthetic tensile force (STF) of the two springs and the governor force (GF) is utilized for increasing or decreasing the supply of fuel through the operation of the fuel adjuster; wherein the idling spring is constituted as a tension coiled spring; wherein the idling spring spring-biases the governor lever in the direction of increasing the supply of the fuel both in the non-load set and in the low-load set (LL), and negates the spring-biasing both in the high-load set (LH) and in the full-load set" that the prior art of record neither taught nor suggested.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
